Information Security & Privacy Policy

PCM Methods & Procedures Consultants Ltd. implements an Information Security & Privacy Management System that complies with the ISO 27001:2022 and ISO 27701:2019 standards and is committed to:

- Ensuring the confidentiality, integrity, and availability of information that is processed, stored, or transmitted electronically or physically through the company's personnel and information systems.
- The timely and prompt identification of and response to emergency situations related to a breach (or potential breach) of the company's information security.
- Ensuring that the information security policy and information security objectives have been established and are compatible with the company's strategic direction.
- Protecting the company's investment in information and communications technologies.
- Complying with the requirements of Greek and European legislation regarding personal data management, confidentiality of communications, intellectual property rights, etc., within the scope of its activities.
- The continuous improvement of the Information Security & Personal Data Management System.
- Defining business requirements regarding the availability of information systems.
- Identifying interested parties and internal/external issues relevant to the context in which the company operates.
- Implementing a risk assessment process to identify threats and opportunities.

The Management of **PCM Methods & Procedures Consultants Ltd.** provides the necessary resources to support the Information Security & Personal Data Management System, provides its personnel with the necessary knowledge, and raises their awareness of information security matters, making full use of their skills and capabilities.

PCM Methods & Procedures Consultants Ltd. fully recognizes the objectives of the Information Security & Personal Data Management System and supports their implementation.
